19.6.5 Dancho Danchev's OSINT and Threat Intelligence Training Video Demonstra-

tion in Bulgarian - Part One (2023-06-04 06:12)

I’ve decided to share with everyone a recently released YouTube video demonstration in

Bulgarian on the topic of OSINT and threat intelligence training.

Here’s a sample Table of Contents for the OSINT and the Threat Intelligence training in

Bulgarian:

Кой се интересува от индивидуално или групово обучение в сферата на OSINT анализ и

превенция на кибер престъпления и анализ и обработка на кибер атаки известен още

като практиката Threat Intelligence? Можете да видите моето CV тук -

[1]http://disruptive-individuals.com/wp-content/uploads/2021/11/Dancho _Danchev _CV

_2021.pdf портфолио от анализи и проучвания от 2005 до 2023 тук -

[2]https://archive.org/details/@ddanchev видео демонстрации тук -

[3]https://youtube.com/@ddanchev и моя журнал тук - [4]https://ddanchev.blogspot.com

демонстрация за наученото тук -

[5]https://archive.org/download/dancho-danchev-cyber-threat-actors-analysis

-2021-2/Dancho _Danchev _Cyber _Threat _Actors _Analysis _2021-2.pdf както и моя мемоар

на Български тук -

27693

[6]https://archive.org/download/dancho-danchev-kiber-razuznavane-audio-knig

a-01-memoar/Dancho _Danchev _Kiber _Razuznavane _Memoar _02.pdf както и видео от

последния Cyber Security Talks Bulgaria -

_Video _Presentation _01.mp4 както и всички мой презентации тук -

[8]https://archive.org/details/rsa-europe-presentation-01 както и всички мои практически

анализи на кибер атали за моя работодател тук -

[9]https://archive.org/details/dancho-danchev-whois-xml-api-maltego-bulletp

roof-infrastructure-2

Примерния курс за OSINT обучение които предлагам включва:

• Достигане до Източника на Кибер Атаката По Време на Анализа на Информация с

Публични Източници

• Използване на Разузнаване на Информация с Публични Източници в анализа на кибер

атаки

• Използване на Разузнаване на Информация с Публични Източници в борбата с

престъпленията

• Кои е Данчо Данчев?

• Кои са някой от текущите ми и бъдещи проекти в сферата?

• Обогатяване на информацията по време на Анализа на Информация с Публични

Източници

• Основи на Разузнаването с Публични Източници на Информация

• Практическа Демонстрация на Анализ на Информация с Публични Източници

• Практически Примери на Анализ на Информация с Публични Източници

• Практически съвети по време на Анализа на Информация с Публични Източници

• Представяне на Курса

• Събиране на Техническа Информация по време на Анализа на Информация с Публични

Източници за Напреднали

• Събиране на Техническа Информация по време на Анализа на Информация с Публични

Източници за Начинаещи

• Тактики и Методологии за Начинаещи

• Тактики и Метотодологии за Напреднали

• Текущо състояние на пазара за продукти и услуги свързани с Разузнаване на

аИнформация с Публични Източници на Информация

• Финален Изпит и Въпроси

Пример курс по threat intelligence който предлагам включва:

• Борба с киберпрестъпността в контекста на използване на информация за заплахи

• Бъдещето на разузнаването на заплахи

• Усъвършенствани практики за разузнаване на заплахи Концепции и методологии -

Практически пример

27694

• Въведение

• Как да използвате публични и собствени бази данни за разузнаване на заплахи

за кампании за приписване на участници в кибернетични заплахи, включително

кръстосани препратки и кръстосана проверка

• Как да обогатите IoC за цялата си компания (индикатори за компрометиране) с

помощта на публични и собствени източници и да свържете точките при голяма

кибератака и кампания за актьор в кибернетична заплаха

• Използване на OSINT в контекста на събиране на информация за заплахи

• Изследване на киберпрестъпления и разузнаване на заплахи IoC (индикатор за

компромис) Обогатяване в контекста на използване на OSINT

• Практиката за борба с киберпрестъпленията чрез разузнаване на заплахи

• Концепции за разузнаване на заплахи за начинаещи

• Методологии за проактивно разузнаване на заплахи

• Методологии за разузнаване на заплахи

• Обогатяване на информация за заплахи в контекста на използване на OSINT

• Как да превърнете вашите клиенти в пасивни и активни разпределени сензори за

събиране на информация за заплахи?

• Основи на разузнаването на заплахи

• Разширено функциониране и поддържане на програма за разузнаване на заплахи в

цялата компания за напреднали потребители

• Практически съвети за разузнаване на заплахи

• Основите на започването на разузнаване на заплахи за начинаещи

• Разузнаване на заплахи в контекста на кибератака.

• Разузнаване на заплахите в контекста на използване на техническо събиране за атаки

с приписване на актьор на кибернетична заплаха

• Разширени концепции за разузнаване на заплахи

• Как да преобразувате крайните точки на служителите на вашата компания в

разпределен сензор за събиране на информация за пасивни и активни разузнавания

за заплахи?

• Текущо състояние на екосистемата за разузнаване на заплахи

• Текущо състояние на пазара за разузнаване на заплахи

• Наистина ли работи методологията „Агрегиране и забравяне“ в областта на

разузнаването на заплахи?

• Основите на стартирането, поддържането и управлението на програма за разузнаване

на заплахи в цялата компания за начинаещи

• Как да обучите вашите анализатори за разузнаване на заплахи да бъдат рок звезди

на индустрията за сигурност и аналитичните и технически рок звезди?

• Тактики и Методологии за Начинаещи

• Тактики и Метотодологии за Напреднали

• Текущо състояние на пазара за продукти и услуги свързани с Разузнаване на

аИнформация с Публични Източници на Информация

• Финален Изпит и Въпроси

Пример курс по threat intelligence който предлагам включва:

• Борба с киберпрестъпността в контекста на използване на информация за заплахи

• Бъдещето на разузнаването на заплахи

• Усъвършенствани практики за разузнаване на заплахи Концепции и методологии -

Практически пример

• Въведение

• Как да използвате публични и собствени бази данни за разузнаване на заплахи

за кампании за приписване на участници в кибернетични заплахи, включително

кръстосани препратки и кръстосана проверка

27706

• Как да обогатите IoC за цялата си компания (индикатори за компрометиране) с

помощта на публични и собствени източници и да свържете точките при голяма

кибератака и кампания за актьор в кибернетична заплаха

• Използване на OSINT в контекста на събиране на информация за

заплахи

• Изследване на киберпрестъпления и разузнаване на заплахи IoC (индикатор за

компромис) Обогатяване в контекста на използване на OSINT

• Практиката за борба с киберпрестъпленията чрез разузнаване на заплахи

• Концепции за разузнаване на заплахи за начинаещи

• Методологии за проактивно разузнаване на заплахи

• Методологии за разузнаване на заплахи

• Обогатяване на информация за заплахи в контекста на използване на OSINT

• Как да превърнете вашите клиенти в пасивни и активни разпределени сензори за

събиране на информация за заплахи?

• Основи на разузнаването на заплахи

• Разширено функциониране и поддържане на програма за разузнаване на заплахи в

цялата компания за напреднали потребители

• Практически съвети за разузнаване на заплахи

• Основите на започването на разузнаване на заплахи за начинаещи

• Разузнаване на заплахи в контекста на кибератака.

• Разузнаване на заплахите в контекста на използване на техническо събиране за атаки

с приписване на актьор на кибернетична заплаха

• Разширени концепции за разузнаване на заплахи

• Как да преобразувате крайните точки на служителите на вашата компания в

разпределен сензор за събиране на информация за пасивни и активни разузнавания

за заплахи?

• Текущо състояние на екосистемата за разузнаване на заплахи

• Текущо състояние на пазара за разузнаване на заплахи

• Наистина ли работи методологията „Агрегиране и забравяне“ в областта на

разузнаването на заплахи?

• Основите на стартирането, поддържането и управлението на програма за разузнаване

на заплахи в цялата компания за начинаещи

• Как да обучите вашите анализатори за разузнаване на заплахи да бъдат рок звезди

на индустрията за сигурност и аналитичните и технически рок звезди?

Cybercrime World Computer Game is an innovative and cutting-edge game that immerses players into the complex and dynamic world of cybercrimes. With its highly realistic graphics and intricate gameplay mechanics, this game provides a unique and informative experience for individuals seeking to understand the inner workings of cybercriminal activities. Through a series of challenging missions and scenarios, players are given the opportunity to navigate through virtual environments, uncover vulnerabilities, execute sophisticated hacking techniques, and ultimately defend against potential cyber threats. The game offers a comprehensive insight into various aspects of cybercrimes like identity theft, social engineering, malware attacks, and data breaches. In addition to its entertainment value, Cybercrime World Computer Game also serves as an effective educational tool, fostering awareness about online security practices and equipping players with the knowledge required to protect themselves from real-world cyber threats. With its flawless execution and compelling narrative structure, this game sets a new standard for the intersection between gaming and cybersecurity awareness.

A computer game about Dancho Danchev's biography would offer an interactive and immersive experience, presenting players with the opportunity to explore the fascinating life of this renowned cybersecurity expert. Drawing from real-life events, the game could start by introducing players to Danchev's early years, highlighting his passion for technology and his pivotal role as combating cybercrime. Through captivating storytelling and gameplay mechanics, players would navigate a series of levels inspired by significant milestones in Danchev's life. They would encounter challenges that mirror his professional struggles, such as dissecting complex malware attacks or uncovering sophisticated hacking techniques. The game could also shed light on his relentless commitment to internet safety and emphasize his active involvement in global cybersecurity initiatives. By creating a dynamic narrative centered around real-world accomplishments, this computer game would not only entertain players but also educate them about the crucial work of cybersecurity professionals like Dancho Danchev.

The Cybercrime World Visual Novel Game is a captivating and thrilling gaming experience set in the dark underbelly of the digital world. This interactive story-driven game immerses players in a gripping narrative centered around cybercrime activities, where they assume the role of an aspiring hacker seeking fame and fortune within this clandestine world. The game's stunning visuals and realistic depiction of hacking techniques enhance the overall gaming experience, providing players with an authentic glimpse into the intricacies of cybercriminal operations. With its meticulously crafted storyline filled with unexpected plot twists and suspenseful moments, players will find themselves engrossed in a world full of danger and deceit. Moreover, the game encourages critical thinking and problem-solving skills as players navigate through intricate puzzles, bypass security systems, and outsmart rivals to ultimately emerge as a renowned "cyberlord." Undoubtedly, this innovative visual novel is poised to captivate gamers who seek intrigue, challenge, and an immersive exploration into the realm of cybercrimes.

A visual novel computer game about hackers combines the immersive storytelling of visual novels with the intriguing world of cybersecurity, offering players a unique and engaging experience. This genre not only delves into the technical aspects but also explores ethical implications and personal dilemmas faced by hackers. Through thoughtfully designed narratives, players are able to grasp complex hacking techniques, learn about digital security practices, and gain insights into the motives driving these characters. The game's attention to detail and realistic portrayal of hacking activities allows players to navigate through a wide range of scenarios, from infiltrating high-security systems to unraveling intricate conspiracies. Moreover, this game can serve as an educational tool, promoting a broader understanding of cybersecurity concepts while entertaining gamers with its captivating plotlines. Ultimately, a visual novel computer game about hackers offers a professional yet thrilling experience for both technology enthusiasts and those seeking to expand their knowledge in this ever-evolving field.

Dear blog readers,

Happy summer or even better said how's the summer in the context of

having me announce

my summer project which is basically a biographical Visual Novel game on which I'm working

using Unity and Articy where the ultimate goal would be to present my story as a teenage

hacker enthusiast throughout the 90's up to present day where I'm a cybercrime researcher

security blogger OSINT analyst and threat intelligence analyst which will consist of real-world

people friends and colleagues from my online experience including colleagues and friends from

the industry where my main goal would be to make this an unforgettable and educational and

also mind and spirit provoking experience for everyone that I've work with online throughout

the years.

[2]

So here's the news? Who wants to sponsor me for this project and for its release in a timely

manner preferably before the end of the summer? It would be really great if you're an orga-

nization or a vendor where I'm full of ideas in terms of how I can give proper credit for your

donation or sponsorship.

Drop me a line at dancho.danchev@hush.com in case you're interested in sponsoring my

project or in case you might have any ideas on terms of how you can contribute here such

as for instance a Unity developer or a game script writer.

Stay tuned!

19.7.4 Dancho Danchev's Disappearance - 2010 - Official

Complaint Against Re-

public of Bulgaria Regarding Dancho Danchev's Illegal Law Enforcement Ar-

rest Home Molestation and Kidnapping Attempt - A Compilation - Part Two

(2023-07-27 22:22)

[1]

[2]Define: peasant forgetting the true reality of non-existence in the universal wannabe

27717

agricultural economy referred to as the very bottom of Eastern Europe.

The following is yet another official complaint part of the compilation of official complaints for

the exact same people that kidnapped me from my place back in 2010 with my stolen ID which

resulted in illegal detention for four months without anyone knowing and without any sort of

explanation up to present day for which I warned in advance and $85,000 later which I legally

earned and lost due to home molestation and on purpose drug poisoning courtesy of Bulgaria's

DANS agency in combination with local peasants and savages from Bulgarian Law Enforcement

from the city of Troyan, Bulgaria which is my hometown.

Whether it's through modest complaints or through other means I promise that I will do my

best to shed more light and continue elaborating more on this case from Bulgaria and three

and five years and $85,000 legally earned and lost due to on purpose

poisoning through other

means other than this case of supreme idiocity and easy to detect and spot local degree of

idiocity and peasant-eria with no explanation up to present day.

Is it a bottom is it a bottom line or is it the bottom line in the very bottom line of yours? I

promise that I'll soon take the time and effort and elaborate in-depth on the degree of savagery

and moronic – apologies there's no such word when it comes to my hometown – peasantaria

and idiocy of the people living in my hometown Troyan, Bulgaria including the very bottom of

what's invisible to others in the true spirit of what some others would describe as something

that I won't tell you which is guess what – it's the very bottom of Eastern Europe.

Whether it's behold yourself to the almighty savior I'm not your savior or behold your almighty

savior person and the very bottom of the dipshits that "make it happen" at their place every

night are going to truly regret it using legal means or at the end we are going to find you a

decent place buy it so that you can rent it and eventually for the blessing of everyone that truly

knows you commit suicide in the true spirit of spending the irrelevance of your existence where

it belongs in the place that we bought and that you rented and where you committed suicide

or in the other place where all of your relatives belong. I won't say but the very smells of your

enticing existence tends to point to everyone's favorite place for

Bulgarian lifestyle dipshits

and irrelevant to the universal irrelevance of your existence place. Guess what? That's not my

place.

19.8 August

19.8.1 Embassy of China in Canada Issues a Statement on U.S Cyber Espionage Cam-

paigns Against Japan (2023-08-11 21:00)

[1]

I just came across to a statement issued by the Embassy of China in Canada on the [2]U.S

cyber espionage campaigns launched against Japan.

What's so special about this statement? First it does quite Wikileaks which is a bit of an

outdated approach including the actual source to shed more light into a bigger problem and

issue for China that the press statement on the Web site of the Chinese Embassy in Canada

mentions. In this specific case the statement implies the use of the so called "hunt-forward"

missions which could really mean big trouble for China if the U.S somehow manages to secure

a deal with a neighbouring country next to China which could really mean big trouble for

China as the U.S will then attempt to establish the foundation for a successful cyber attacks

and possibly information operations interception campaigns used managed and operated by

China including its partners and allies where to ultimate goal would be to measure their true

capabilities and set the foundation for a successful cyber situational awareness campaign in

terms of cyber attacks and the true state of China's true cyberspace operations and cyber

attack capabilities including the capabilities of some of its neighbouring countries.

The so called [3]Hunt Forward Operations also known as (HFOs) are an early warning system

for cyber situational awareness that could improve the true state of the visibility of the actual

country that's doing these missions in this specific case the U.S could really learn a lot about

new tactics and techniques courtesy of the attackers based in the specific country where it's

hosting its mission which could be really bad news for China in terms of having the U.S deploy

hunt forward missions in its neighbouring countries where the U.S could really get a better

picture of China’s understanding and actual applicability of basic cyber warfare principles and

concepts in action including the "know-how" of its neighbouring countries.

Despite the fact that the U.S is willing to share its knowledge and understanding of cyber

attacks "know-how" with the host country of a hunt forward mission it could also learn a lot

about the cyber attacks that originate from the host country and possibly improve its own

situational awareness in the field including from a geographical perspective.

Happy hunting.

19.8.3 A Portfolio of Iran-Based Hacker Groups and Lone Iran-based Hackers Per-

sonal Web Sites (2023-08-11 21:01)

[1]

27724

In need of a freshly collected Iran-based hacker groups and lone hacker personal Web sites?

As I did some homework on the topic of finding these I actually came across to the fact that

the majority of these are located on an Iran-based hosting provider

known as Persiangig.com

and as I've decided to dig a little bit deeper I came across to and actually bothered to compile

a portfolio of these Web sites which I decided to share with everyone ready here.

Sample Iran-based hacker groups and lone hacker personal Web sites include:

hxxp://adibii.persiangig.com/

hxxp://ahm4d-h4cker.persiangig.com/

hxxp://ahmadbady.persiangig.com/

19.8.4 A Compilation of Bulletproof Hosting Provider Domains (2023-08-13 10:27)

[1]

In need of a fresh and relevant bulletproof hosting provider domain list for research purposes?

Check out the following list of domains which I compiled today and decided to share with

everyone reading my blog.

Sample bulletproof hosting provider domains include:

hxxp://1984hosting.com

hxxp://2X4.ru

hxxp://2sync.co

hxxp://3nt.com

hxxp://NovoGara.com

hxxp://abusehosting.ru

hxxp://admintek.net

hxxp://advania.com

hxxp://afranet.com

hxxp://agava.ru

hxxp://albahost.net

hxxp://alexhost.com

27747

hxxp://altushost.com

hxxp://anders.ru

hxxp://anonymoushosting.in

hxxp://antiddos.biz

hxxp://area6.ru

hxxp://artmotion.eu

hxxp://asiapacific-it.com

hxxp://asiapacifichosting.com

hxxp://atlax.com

hxxp://availo.se

hxxp://avk-com.ru

hxxp://bacloud.com

hxxp://bahnhof.net

Folks,

I've been recently digging deep into the ever evolving cybercrime ecosystem doing research

and trying to supply as much personally identifiable information on the bad guys in the form of

personally identifiable email address accounts including XMPP/Jabber account IDs where the

ultimate goal would be to properly assist everyone on their way to properly do their research

including the U.S Intelligence Community and U.S Law Enforcement on its way to properly

track down and monitor the individuals behind these campaigns.

In this post I'll share with everyone a recently processed portfolio of

personally identifiable

XMPP/Jabber account IDs with the idea to assist everyone on their way to properly do their

research including to assist the U.S Intelligence Community and U.S Law Enforcement on its

way to properly track down and monitor these individuals.

Happy research.

Sample personally identifiable cybercriminals XMPP/Jabber account IDs include:

19.8.6 A Compilation of Personally Identifiable Email Address Accounts Known to

Belong to Ransomware Operators (2023-08-20 20:37)

[1]

27789

Dear blog readers,

The following is a set of personally identifiable email address accounts known to belong to

ransomware operators or participants in ransomware-themed affiliate-based partner programs

which I've decided to share with everyone doing research on the topic and looking for clues or

additional resources on how to improve their research including U.S Law Enforcement where

the ultimate goal would be to track down monitor and prosecute the individuals behind these

campaigns internationally.

Sample personally identifiable email address accounts known to belong to ransomware oper-

ators or members of ransomware themed affiliate-based networks include:

19.8.7 A New Anarchy RAT (Remote Access Tool) Malicious Software Spotted in the

Wild (2023-08-20 20:37)

[1]

An image is worth a thousand words - part two.

I've recently came across to a newly released malicious software which basically allows

novice and experienced users with the ability to launch and manage access to compromised

corporate and home networks and PCs where the ultimate goal would be to do this as easy as

possible.

Sample screenshots include:

19.8.8 A DIY Cryptocurrency Exchange Phishing Kit Spotted in the Wild

(2023-08-20 20:37)

[1]

An image is worth a thousand words.

I've recently came across to a DIY cryptocurrency exchange phishing kit where basically the

vendor allows you to set up your own fake cryptocurrency exchange which could be later on

used to trick and entice users into falling victim into this scam potentially affecting hundreds

of thousands of gullible users thanks to the professional DIY templates managed and operated

by the vendor.

Максимальный уровень надежности
Быстрый обмен криптовалюты
Поддержка активных направлений
100% гарантия обмена
У нас выгодные курсы
Отзывы о нашем обменнике
Хорошие курсы, быстрый обмен.
Игнат
Переводил из тезера в btc, обмен прошел без проблем и быстро.
Илья
В ночное время перевод идет дольше на 5-7 минут, в остальном все в порядке. техподдержка на уровне. Спасибо
Владимир
Отлично работает, быстро.

AML/KYC
Last Updated: February, 2022
This document gives an overview of the standards of the "Know Your Customer" and "Anti-Money Laundering" policies, thereby setting our practices for the prevention of money-laundering activities while dealing with our users.
The objective of AML/KYC Policy is to prevent ool_exchange from being used, intentionally or unintentionally, by criminal elements for money-laundering activities. The Policy also mandates making reasonable efforts to determine the true identity and beneficial ownership of accounts, source of funds, the nature of customer's business, the reasonableness of operations in the account in relation to the customer's business, etc., which in turn helps us to manage its risks prudently.
We strive to protect our customers from fraudulent and scam activities in the crypto assets sphere. ool_exchange employs a steadfast approach in the implementation of the latest recommendations and revised guidelines by FATF, European Parliament, and regulators of the financial industry by and large. Our in-compliance policy stance is designed to detect funds proven to be involved in illicit activities as well as to protect the funds of our customers who have fallen victims to hacks, ransomware and malware attacks. The toolkit at work committed to fighting money laundering and its implications is comprised of policy regulations in conjunction with recent developments in software aimed at tracking suspicious transactions in real time.
Our AML/KYC Policy, procedures, and internal controls are designed to ensure compliance with all applicable regulations and rules and will be reviewed and updated on a regular basis to ensure appropriate policies, procedures, and internal controls are in place, to account for both changes in regulations and changes in our business.
Glossary:
• AML Anti-Money Laundering
• KYC Know Your Customer
• CIP Customer Identification Program
• PEP Politically Exposed Persons
• STR Suspicious Transaction Reporting
• SAR Suspicious Activity Reporting
The Policy covers the following matters:
• CUSTOMER IDENTIFICATION PROCEDURE (CIP)
• RECORDKEEPING
• AML COMPLIANCE OFFICER

Folks,

This is the third part of the blog posts series where I'm actively data mining publicly and private

invite only cybercrime-friendly communities looking for personally identifiable email address

accounts and XMPP/Jabber account IDs with the idea to assist everyone on their way to properly

do their research including the U.S Intelligence Community and U.S Law Enforcement on its way

to properly track down and monitor the individuals behind these campaigns.

Sample XMPP/Jabber account IDs include:

19.8.15 Who’s Behind the Conti Ransomware Gang? (2023-08-27 17:35)

[1]

Re-defining the basics of real-time OSINT?

Here’s how it’s done. Obtain quick access to a recently leaked internal

communication courtesy

of a major ransomware gang. Quickly attempt to data mine it looking for personally identifiable

email address accounts and URLs then automatically visit these URLs and produce and publish

high quality analysis on who’s behind the Conti Ransomware Gang.

Here’s the analysis:

Dear folks. I'm about to get featured in a very prestigious cyber security magazine in a very

prestigious edition. Unfortunately as I'm slowly transitioning into becoming an independent

contractor again where most and the best of my research comes from I'm practically broke

and I might need your assistance here. Anyone up to assist and support me here? Drop me a

line and I'll explain - dancho.danchev@hush.com

Stay tuned!

19.9 September

19.9.1 A Psychological Profile of Nicolay Sabchev/Nikolay Subchev Troyan, Bulgarian,

A Wannabe Psychedelic Trance DJ - Part of the "Local Diships Gang" - From the

Awesome But I Smell Like Dipshit Department - An Analysis (2023-09-04 01:47)

[1]

28083

This is from the "I sincerely apologies for this post but you robbed beated and home molested

me and stole $85,000 with your savages friends from your and my hometown Troyan, Bulgaria

without anyone knowing that also includes the police" department post.

Does it smell like [2]dipships in Bulgaria or does it smells like dipshits in Bulgaria? Appreciate

my rhetoric. It does but exactly where it does - in the toilet.

T-Shirt - $1

Haircut - $1

Equipment - $1

Sample photos:

[3]

28084

[4]

28085

[5]

[6]

28086

Total amount owed during the years for existence that’s so cool that cannot be appreciated

due to logical and low life unappreciated existence where even nature cannot help you to "get

high" - $0. How come?

That’s life.

19.9.3 The Conti Ransomware Gang and the Trickbot Cybercrime Enterprise XMPP's

and Jabber Account IDs (2023-09-08 13:07)

The power of OSINT and real-time OSINT which has been my methodology since December,

2005 when I originally launched this blog? Check out the following analysis courtesy of me

which details in-depth who's behind the [1]Conti Ransomware Gang and the [2]Trickbot cyber-

crime enterprise using exclusively and entirely public sources of information in combination

with my real-time OSINT methodology hence the results.

[3]

28088

Sample XMPP and Jabber account IDs include:

liamliam@xmpp.jp

ohmygod728@xmpp.jp

It gets even better with the recent [4] OFAC sanctions that also mention several interesting

email address accounts:

volhvb@mail.ru

volhvb@live.ru

volhvb@yandex.ru

volhvb@gmail.com

rfonin@gmail.com

mfonin@jabber.ru

tsarev89@gmail.com

28090

megaprof@gmail.com

refflex@gmail.com

It gets even more interesting when we dig a little bit deeper and find related domain registra-

tions associated with these email address accounts.

[5]

For instance we have hxxp://baikal-tour.su which is a travel agency and hxxp://kurochkina.com

which is Ekaterina Kurochkina who is a fashion photographer currently known as Valentina

Ushenina currently a training instructor at the PortDeBras company where we have the same

domains registered by a known individual on the Conti Ransomware Gang’s sanctions list

(megaprof@gmail.com).

We

also

have

a

Google

Play

application

(hxxp://play.google.com/store/apps/detai-

ls?id = com.WSCards.RSP & &gl = US) that also points to (hxxp://finters.su) which stands

for an international sports organization.

Personally identifiable information on Valentina Ushenina include:

Skype: valentinatigra

hxxp://vk.com/id3151577

Email: kyrochkina.sug@mail.ru; tkanikurik@yahoo.com

Sample photos of Valentina Ushenina include:

[6]

28091

[7]

28092

[8]

28093

[9]

28094

[10]

[11]

[12]

28095

[13]

28096

[14]

28097

[15]

28098

28099

[16]

All known domains known to have been registered by megaprof@gmail.com include:

hxxp://artfreegallery.us

hxxp://artfreegallery.com

hxxp://kurochkina.com

hxxp://s23.su

hxxp://baikal-tour.su

hxxp://finters.su

All known domains known to have been registered by tsarev89@gmail.com include:

hxxp://art-deko.biz

hxxp://serpwomanhealth.info

hxxp://avtofortuna.info

hxxp://knigodvor.info

hxxp://alkommet.com

hxxp://art-deko.info

19.9.6 Sample Breach Forums Personally Identifiable Cybercriminal Email Address

Accounts (2023-09-17 18:10)

[1]

28103

Dear blog readers,

The following is a personally identifiable email address compilation known to belong to known

members of the Breach Forums cybercrime-friendly forum community which I've decided

to share with the idea to assist researchers vendors and organizations including U.S Law

Enforcement on its way to properly track down and monitor and prosecute the cybercriminals

behind these campaigns.

Sample personally identifiable email address accounts of known Breach Forums members

include:

19.9.7 Sample

Personally

Identifiable

Cybercriminal

XMPP/Jabber

Accounts

(2023-09-17 18:10)

[1]

Dear blog readers,

The following compilation of XMPP/Jabber account IDs known to belong to cybercriminals which

I obtained using public and proprietary sources including data mining aims to assist researchers

vendors and organizations including U.S Law Enforcement on its way to properly track down

and monitor including to prosecute the cybercriminals behind these campaigns.

Sample XMPP/Jabber accounts IDs known to belong to cybercriminals and known to have been

involved in various campaigns include:

19.9.8 Sample Personally Identifiable XMPP/Jabber Accounts of the Gozi/Ursnif Mal-

ware Gang Team Members (2023-09-17 18:10)

[1]

Digging a little bit deeper into my ongoing research into various personally identifiable infor-

mation such as for instance email address accounts and XMPP/Jabber account IDs belonging

to cybercriminals I've decided to share a compilation of XMPP/Jabber account IDs known to

belong to the Gozi/Ursnif malware gang team members with the idea to assist researchers

vendors and organizations including U.S Law Enforcement on its way to properly track down

monitor and prosecute the cybercriminals behind these campaigns.

Sample XMPP/Jabber account IDs known to have been involved in the campaign include:

newjabber@jabbim.com

cash@allinione.com

slark@jix.im

19.9.9 OSINT

Round-Up

of

Russia-Based

High-Profile

Cybercriminals

(2023-09-18 12:17)

[1]

In my line of work in specific when doing research and analysis I always stick to a common

concept which has to do with the fact that “everything that can be found has already been

found somewhere online”. Sticking to this basic methodology the only thing an individual or a

researcher has to do is to look up the facts including all the relevant and necessary technical

information on the individual or case they’re working on and basically come up with a proper

analysis relying on publicly obtainable and publicly accessible information on their topic of

interest.

In this rather long OSINT analysis article I'll do a OSINT roundup of Russia-based high-profile

ransomware cybercriminals with the idea to share my research and analysis on the topic and

potentially assist other researchers and vendors including U.S Law Enforcement on its way to

properly track down and monitor and prosecute these cybercriminals.

28148

www.sendspace.com/file/ihkxpi\nhttps
www.sendspace.com/delete/ihkxpi/34bc372eb03961ca4d7

[2]

\I'll begin this analysis with an emphasis and actual OSINT research and analysis on the Conti

Ransomware Group in the context of demonstrating what real-time OSINT is which a pretty

good and decent methodology that I've been relying and using over the years which works.

It all began with an internally leaked and made publicly accessible Conti Ransomware Gang's

internal communication where a security researcher or a set of security researchers appear to

have compromised their internal server and have been collecting conversation logs between

the cybercriminals which they later on made publicly accessible on Twitter in a specific for the

purpose account that basically included direct download links to their internal communication.

From an OSINT perspective the first thing a researcher should do is to do their best to obtain

access to these conversation logs and attempt to preserve them for current and future use

which is something that I did almost immediately considering the possibility to monitor and

track down who the actual individuals behind this massive ransomware campaign are.

The results? I've managed to successfully identify some of key individuals behind the Conti

Ransomware Gang in terms of top management where my believe is that although it was a hired

or outsourced "know-how" in the beginning quickly matured into a cybercrime enterprise where

everyone who wanted to could join on a "franchise" based model and just do their work and

earn fraudulently and maliciously obtained revenue from legitimate companies who are having

their networks compromised and sensitive data and information made publicly accessible or

basically encrypted in a way making it impossible for the actual organization and company to

use.

What is the Conti ransomware gang up to in terms of top management? It appears that the

gang's top management in a way is involved in the fashion industry with the idea that some

of the screenshots that I obtained and processed and analyzed which were leaked internally in

the form of exchange of URLs between the gang's members lead me to believe that the gang

is involved in either investing in fashion brands or actually working on such with several suc-

cessful public OSINT analyses on the topic where I've managed to identify some of the fashion

brands behind the Conti Ransomware Gang's top management and my goal here is to present

the actual findings with the idea to bring this fact to more light in the context of providing

information on the activity of the Conti Ransomware Gang's top management members.

[3]

28149

[4]

28150

[5]

28151

[6]

28152

[7]

28153

[8]

28154

So basically once I came across their internal leaked communication made publicly accessible

on Twitter I immediately aimed to obtain access to the leaked internal information of the Conti

ransomware gang and preserve it before it goes online so that I can later on work with it and

successfully produce the analysis including all the screenshots managed and operated by the

Conti ransomware gang and here's how I did it.

Basically once I obtained access to their internal leaked communication which was made pub-

licly accessible I data mined the internal leaked communication looking for personally identi-

fiable email address accounts and related URLs with success which is where I automatically

visited these URLs which I data mined in the Conti ransomware gang's internal leaked commu-

nication and basically grabbed all the live URLs information which is where the analysis and the

screenshots including the actual report come from which I produced and have been working

on to produce exclusively for fellow researchers and vendors including U.S Law Enforcement

in order to assist everyone on their way to properly track down monitor and prosecute.

Sample Internally Leaked URLs Courtesy of the Conti Ransomware Gang Obtained Using Public

Sources

There are several other fashion brand themed screenshots which I also managed to obtain

which appear to be directly related to the Conti ransomware gang.

Here are some of the "upcoming brands" courtesy of the Conti Ransomware Gang obtained

28155

using real-time OSINT and relying on their internally leaked communications proving the gang

including its top management is into fashion brands and the industry:

Here’s some personally identifiable information on some of the brands using OSINT and public

sources of information:

19.9.10 Exposing the Bulgarian Cyber Army Cyber Threat Actor (2023-09-18 12:28)

[1]

Anonymous Bulgaria is your typical Anonymous “franchise” Anonymous hackers model where

you have a group of people doing web site defacements and compromises of legitimate web

sites and infrastructure and actually blame a bigger cause that they don’t really have anything

to do with and don’t understand or know anything about it.

The ultimate goal here would be for the group to gain momentum including to attract followers

where the ultimate goal would be to spread a message that they don’t often understand or

have anything to do with low profile DDoS attacks or cyber attack attempts similar and typical

to the Anonymous hackers collective idea.

Is it script kiddies or low profile wannabe hacker groups that basically have one social media

account and are capable of launching low profile cyber attack attempts that often make the

news or is it a bigger conspiracy where everyone doing the same can outsource their respon-

sibility for doing it to the entire “idea” which basically represents an Anonymous set of people

attempting to do low profile cyber attack attempts?

[2]

28203

Let’s go for the first part.

The important part when dealing with this type of low profile threat actor is to usually keep

track of their activities including social media profiles and activity and look for additional clues

in terms of current and ongoing cyber attacks and most importantly look for additional clues

such as personally identifiable information which would be later on used in a possible cyber

threat actor attribution campaigns including for the actual enrichment of this PII for the purpose

of looking for additional clues in terms of doing threat actor infrastructure reconnaissance

on your way to look for additional clues such as related malicious and fraudulent including

cybercrime activity including domains personally identifiable email address accounts or related

social media accounts.

[3]

The ultimate goal when collecting these would be yo either build a database of the threat actor

in question which could lead to a possible commercial or community driven project venture

28204

or to assist fellow researchers and Law Enforcement on its way go track down monitor and

prosecute these individuals.

[4]

In this article I'll discuss in-depth the Anonymous Bulgaria hacker franchise that basically just

like many other Anonymous franchises across the globe basically represent low profile cyber

attack attempts type of threat actors and will provide personally identifiable information on

their online whereabouts.

[5]

28205

Some of the other Bulgarian Web site defacement groups that are known to work and coop-

erate with Bulgarian Cyber Army include BG Worm, MTH Soft, Hack3D TeaM and EvilHack and

Anonymous Bulgaria.

[6]

28206

What's specifically interesting about Bulgarian Cyber Army is that the group appears to be still

and currently active and operational based on some of their latest web site defacement and

Facebook activity.

19.9.11 Applying for the Rewards for Justice on the Conti Ransomware Gang Pro-

gram (2023-09-18 20:08)

[1]

Dear blog readers,

This is Dancho and I have some news. I just applied for the United States Rewards for Justice

program on the Conti Ransomware Gang and I identified myself with my research and analysis.

19.9.12 Yavor Kolev - Part Two (2023-09-18 20:39)

[1]

Dear blog readers,

Are you in a desperate need to reach out to someone who's basically

the exact definition of

a toilet person? Is it the taste or is it the smell? Is it the desperate need or the promise for

something cool and interesting?

Let's start from the basics by defining the terms. Just what exactly a toilet person is? A toilet

person but correct me if I'm wrong since I don't mean to be weird knowing this is someone

supposedly thinking that first of all the toilet is a cool thing and most of all since the person

is supposedly thinking he's also cool he should either buy a toilet or live and work there. In a

toilet? A toilet through the perspective of a toilet person is an entire universe and let's don't

forget a supposedly something that although he wouldn't understand at the beginning an entire

dimension.

A second logical question emerges? Is the very bottom of your pathetic and moronic existence

and should the very spitness and social vomitness of your irrelevant social existence set an

example for others?

The answer is no.

Stay tuned!

19.9.14 A New CINOSHI Cryptocurrency Stealing Malicious Software Spotted in the

Wild (2023-09-18 23:45)

[1]

28221

I just came across to a newly released cryptocurrency stealing malicious software as a service

cybercrime ecosystem proposition which has a lot of cryptocurrency and related accounting

data stealing capabilities.

Sample screenshots:

[2]

Sample description:

Cinoshi — это MaaS (Malware-as-a-Service) проект, который предоставляет своим

клиентам функционал стиллера, ботнета, клиппера и майнера. Весь ранее озвученный

функционал находится в одном билде и поддерживает работу со всеми устройствами с

операционной системой Windows. Легко поддается крипту, а также имет ряд полезных

функций, которые не дадут вашим логам / ботам пропасть в неизвестной бездне. Мы

28222

очень много времени уделили оптимизации билда, идеальной работе проекта, а также

системе автоматической замены прокладок. Все это для того, чтобы вам было удобно

работать с вашим трафиком!

Функционал Stealer:

— сбор паролей с браузеров на устройстве жертвы

— сбор куки файлов с браузеров на устройстве жертвы

— сбор десктопных криптокошельков и расширений с браузеров

— сбор всей информации о устройстве (компьютере) жертвы

— сбор сессий Steam (сбор ssfn и vdf файлов)

— сбор токенов Discord (поддержка множества популярных клиентов)

— сбор сессий Telegram (сбор по динамическим путям)

— сбор данных с файлового клиента WinSCP (сбор с реестра)

— сбор данных с файлового клиента FileZilla (сбор с recentservers.xml)

— сохранение скриншотов каждого монитора с компьютера жертвы в лог

— рекурсивный сбор файлов с рабочего стола и папки документов

— отображение фейковой ошибки (текст ошибки и названия окна настраивается на

панельке)

— защита от виртуальных машин, песочниц, Virustotal, Any.Run и дедиков (настраивается

на панельке)

— домен-детектор для поиска нужных линков в паролях и куки (фильтры для

domaindetect-а настраиваются на панельке)

— сбор лога осуществляется в памяти (снижение рантайм детектов)

Функционал Clipper:

— подмена 9-ти криптокошельков в буфере обмена на ваши

— подмена трейд ссылки Steam на вашу

— получение кошелька с сервера происходит каждый раз, то есть при смене кошелька

все уже установленные клипперы начнут заменять на новый адрес

Функционал Botnet:

— запись в автозапуск Windows

— добавление в исключения Windows Defender-а

— выполнение команд с панели (скачать и запустить файл)

— возможность проливать несколько файлов одновременно

— возможность указать уникальное количество запусков

— возможность получения гостевой ссылки со статистикой (подойдет для продажи

инсталлов)

Функционал Miner:

— полная настройка майнера прямо с панели (облачная настройка, при смене кошельков

или настроек вам не придется менять билд майнера)

28223

— добавление в исключения Windows Defender-а, а также отключение обновлений

безопасности Windows

— возможность отключения майнера в полноэкранном режиме, чтобы боты не палили

майнер играя в игры

— поддержка двух монет одновременно: Monero на процессоре, Ethereum Classic на

видеокарте

— автоскрытие/автовыход при открытии диспетчера задач.

Подписки:

Cinoshi $99 - месяц [Поддержка по любым вопросам, панель, Stealer, Botnet, Miner, Clipper,

обновления]

Стоимость подписки навсегда обговаривается лично.

19.9.15 A New X-Files Accounting Data Stealer Spotted in the Wild (2023-09-18 23:45)

[1]

I just came across to a newly released accounting data stealer known as X-Files. Priced as a

managed service on a monthly based subscription starting at $120 - 1 Month. $650 - 6 Months.

28224

(bonus after the update) $1250 - 12 Months. (bonus after the update) which covers a variety

of different and unique cryptocurrency stealing and grabbing

approaches.

Sample screenshots include:

19.9.16 A New Kristina CS DIY Ransomware Spotted in the Wild (2023-09-18 23:45)

[1]

28229

I just came across to a new DIY ransomware offered within the cybercrime ecosystem. Priced at

$2,500 it also offers something I haven't seen in a while in specific for a ransomware cybercrime

ecosystem proposition namely its self-propagating features.

Sample description:

Этот билд не безызвестный криптолокер/вымогатель/ шифровальщик, шифрует все

файлы ПК за исключением файлов Windows не нарушая работы системы "клиента"

ПК/сервера.

Данная схема заработка серая, прибыль зависит исключительно от Вас и уделенного

времени и составляет от нуля кто ничего не делает до бесконечности.

Данный билд никогда не работал и не будет работать по РФ и странам СНГ, это наше

неотъемлемое кредо.

ТТХ и возможности KristinaCS:

- разработан на высокоуровневым языке, метод шифрования AES 256;

- работает на всех версиях Windows начиная с 2003 года, x84/x64 и так же Server;

- высокая скорость шифрования обеспечена частичным шифрованием файла;

- шифрует все диски и сьемные носители во время шифрования (флеш карты, sd карты

и так далее);

- при запуске определяет локальную сеть, шифрует носители сети;

- возможность выбора определенного шифруемого диска или сьемного носителя;

- возможность выбора количества поток шифрования, рекомендуемые параметры ПО

задаст самостоятельно, в зависимости от производительности

ПК/Сервера;

- не трогает необходимые файлы и папки Windows для продолжения работы ПК/Сервера;

- при шифровании происходит полная перезапись файлов поверх,

что делает

практически не возможным организовать восстановление данных с помощью R-studio

и прочими продуктами;

- полностью офф-лайн шифровальщик, при работе не требуется ваше присутствие;

- после шифрования заменяются обои на рабочем столе и во всех корневых папках

создаётся текстовый документ с инструкциями, а так же заменяет название всех файлов

на адрес эл. почты для связи;

- есть функция расшифровки любого файла на выбор, что бы ваш "клиент" мог убедиться

что вы обладаете такой возможностью;

- процесс шифрования происходит в режиме HIDE и не позволит "клиенту" обнаружить

его, после окончания продукт автоматически удаляется с ПК/Сервера клиента, так же

присутствует данная функция на дешифраторе, тем самым вам не нужно следить за

процессом и после "заметать" следы;

28230

Варианты сотрудничества с нами:

1) Условно бесплатная (Распространение):

При такой схеме Вы становитесь распространителем,

получаете бесплатно от

нас шифровальщик KristinaCS L (L- locker), привязанный на нашу почту, который

распространяете самостоятельно.

Схема работы следующая:

Ваши "клиенты" связываются с нами, мы общаемся, выставляем свои фиксированные

требования в размере 300 usd.

После получения выгоды от вашего "клиента" мы выплачиваем Вам 70 % от полученных

средств. Выплаты производятся раз в неделю, каждую пятницу, только на ваш кошелек

BTC.

Стоимость продукта: 0usd

2) Продажа билда (Ручная версия):

При полной покупке, вам полностью передается ПО привязанную на вашу почту, для

самостоятельной работы. Таким образом вам открываются следующие возможности:

- самостоятельно общаетесь с "клиентами", контролируете процесс от и до;

- самостоятельно устанавливаете размер вашей выгоды с "клиента", отставляете

возможность торга, а так же способ получения;

- появляется возможность собрать собственную команду распространителей, при

которой самостоятельно назначаете условия работы с ними;

В комплект KristinaCS входит:

- KristinaCS L - непосредственно сам локер/шифровальщик привязанный на вашу почту,

которая будет отображаться на всех шифрованных файлах для связи с вами, а так же

на обоях рабочего стола и в текстовых файлах в каждой папке. Ручная версия подходит

для распространения по RDP и прочих способов, кроме спама;

- KristinaCS D - дешифратор файлов;

- KristinaCS K - генератор ключа для дешифратора;

Стоимость продукта: 1000usd

3) Продажа билда (Автоматический старт);

Все те же самые возможности и комплектность как в пункте 2, за исключением что

данная версия предназначена для распространения по средством спама.

Стоимость продукта: 2500usd

Дополнительные услуги:

- мануал по бесплатной схеме сотрудничества - бесплатно;

- мануал по работе билда - бесплатно;

- мануал по способам распространения и безопасности - бесплатно;

- обновления ПО - бесплатно;

- замена эл.адреса на для тех кто работает по схеме 2 и 3 - стоимость 200usd;

- аренда сервера с установленным ПО для брута RDP - стоимость 100usd в месяц;

- платное обучение работе, по работе с ПО, по безопасности индивидуальное либо

в небольших группах для тех кто не смог разобраться в мануалах самостоятельно -

стоимость 100usd;

Работа через гарант данной площадки приветствуется, за наш счет.

Все взаиморасчеты с нами только по средством BTC.

19.9.17 New Images Courtesy of the Conti Ransomware Gang (2023-09-20 12:26)

Dear blog readers,

I decided to share with everyone yet another screenshots portfolio courtesy of the [1]Conti

ransomware gang based on their leaked internal communication which I obtained using my

methodology.

What's specifically interesting about the first image is the mentioning of the [2]morenehost

bulletproof hosting provider including a dance and teaching school initiatives including the

usual fashion brand initiative courtesy of the gang.

19.9.18 Yavor Kolev - Part Three (2023-09-21 18:34)

[1]

What's the main difference between a Bulgarian and the rest of the world? It's vomit. It's the

vomit that sometimes unites us and it's the vomit that sometimes separates us.

In this case. It's the end of the line and goodbye.

Stay tuned!

19.9.20 Can You Recognize This Guy? (2023-09-26 19:04)

[1]

28247

Dear blog readers,

There was a speculation approximately a decade ago that I went missing. Can you recognize

this guy in the picture? If you want to look for him try asking these people as this is me circa

2009 when I was illegally arrested without a warrant and detained for a period of several

months without an explanation with my ID stolen from my place and me taken with force

from my house with no witnesses and explanation by three local police officers from the City

of Troyan, Bulgaria and taken to an unknown car which doesn't look like a police car with no

explanation and taken to another city to live for a period of couple of months where I had my

phone and personal ID taken and locked down including my belt.

Now here comes the surprise. If you truly need to find me and of course ask these people

that you see on the picture where I am you can also visit my Twitter account one which I on

purposely registered for the event Christmas Holidays back in 2009 which is -

https://twitter.com/koleda2009 where here comes the surprise I checked in in my place with

28248

big respect and apologies to all my friends who know what I work and what I've been up to

including the actual location where I was back then basically in the woods however with a

return ticket.

Sample photo:

19.9.23 Bulgarian-Themed Ransomware Group Affects Small E-Business Web Sites

in Bulgaria, A1 Pays Ransom (2023-09-27 12:52)

[1]

28280

Wannabe ransomware affiliate partners and original ransomware creators of the World unite?

I've recently came across to a small Bulgarian-themed ransomware group known as Ransomed

VC that appears to be targeting and increasing the targeting of Bulgarian-based Web sites and

demanding ransom in exchange for not disclosing the information that they obtained using a

compromise of their infrastructure.

The group appears to be cooperating with another group known as Everest Ransomware Group.

19.9.24 My New Dark Web Onion - Soliciting Your Input On Personally Identifiable

Information on the Bad Guys (2023-09-27 19:51)

[1]

Dear blog readers,

I'm soliciting your anonymous and pseudo anonymous tips including actual personally identi-

fiable information on the bad guys on my newly launched Dark Web Onion where I promise

28290

to communicate your tips and personally identifiable information on the bad guys to a vast

network of contacts who might find it useful and relevant.

Sample things you can submit include basically anything related to personally identifiable infor-

mation on the bad guys and I promise that I will do my best to communicate your information

to a vast network of people who might need it.

19.10.1 Upcoming "The Hacker Scene - 1983 - 2023" E-Book (2023-10-03 02:17)

[1]

28292

Dear blog readers,

I'm working on a new book. It's called "The Hacker Scene - 1983 - 2023" where I aim to dazzle

you as always and as usual with all the juicy technical details that you're supposedly used to

by now and will hopefully continue to be.

I intend to release this throughout the Christmas season online for free on my [2]Archive.org

account.

Thank you.

19.10.7 Yavor Kolev - Part Four (2023-10-13 19:34)

[1]

28304

Dear,

Don’t tell me you got money to buy clothes? Is this a suit? Go grab some decent clothes first

to begin with then go home and kill yourself. But do it loudly in the toilet but before that take

a big "your work stuff" so that when we come to visit you we can take a photo of you in all of

your glory the "your work stuff" part.

Enjoy!

19.10.9 Exposing North Korea's IT Worker's Eden Programming Solutions WMD-

Funding IT Services and Solutions Franchise - An Overview (2023-10-22 20:24)

[1]

Jessus. [2]This [3]just [4]in and I think I "did it" and I might even apply fore the Rewards for

Justice program second time in a row this time believe it or on North Korea's WMD program

in terms of tracking down North Korean IT workers that appear to have launched massive

domain farms and are actively recruiting in the field of developers and IT workers to build

mobile applications and web sites where the amount at least according to the U.S Government

goes to fund their WMD program.

In this analysis which I did in less than two hours time I'll expose the entire domain portfolio of

North Korea's IT workers that are busy franchising across the glove potentially funding North

28344

Korea's WMD program at least according to the U.S Government and will offer in-depth peek

inside their Internet-connected infrastructure.

НЭТК Информационные системы & Программирование
27 May 2022 at 7:30 pm

Всем добрый вечер😊!
Вот и опять настал тот вечер, когда пришла пора читать о людях которые нам интересны, о которых приятно вспоминать. Именно поэтому продолжаем рубрику #Выпускники нашей специальности.
Кстати, точно знаем, что вы с нетерпением ждете наших вечерних выпусков! Ведь именно этими людьми мы гордимся и с нетерпением ждем встречи! Не задерживаемся и читаем😉...
❗ И так это было не очень давно и мы помним этого человека. Выпускник 2019 года Клопов Артур. В годы учебы Артур был участником олимпиад и конкурсов по программированию и всегда защищал честь специальности #Информационные_системы, и всего Нижегородского экономико-технологического колледжа.
❗ На сегодняшний день живет в Нижнем Новгороде.
❗ Учится в Нижегородском государственном архитектурно-строительном университете, специальность "Программная инженерия", заочно.
❗ Как и в годы учебы продолжает работать программистом по удаленке.
❗ Работает на аутсорсе с несколькими компаниями, такими как:
- The Ready Games (https://ready.gg/);
- Ready Maker;
- Eden Programming Solutions (https://edenprogram.com/), но компания выступает посредником, а проекты под NDA;
- A-Games (https://a-games.fun/), с которой работал в последнее время: две игры на мобильные платформы.
❗ Языки программирования которые использует в работе: основной c# и java для написания плагинов для андройда, а objective-c для плагинов на ios, Rust.
✅ Ну наконец-то воскликнем: ТЫ Ж ПРОГРАММИСТ АРТУР😉!!!!
Ждем в гости и всегда рады видеть👍!!!!! ОБЯЗАТЕЛЬНО ПРОХОДИ ❗

Facebook's Continued Fight Against Koobface

by Facebook Security on Tuesday, January 17, 2012 at 9:09am

It has almost been a year since we gave you our last update on the Koobface virus. After more than 3 years and numerous hours of working closely with industry leaders, the security community, and law enforcement, we are pleased to announce that Facebook has been free of infections for over 9 months.

Today, Koobface is still impacting other web properties and continues to threaten security for Internet users across the globe. While we have been able to keep Koobface off Facebook, we won't declare victory against the virus until its authors are brought to justice. We feel it is the interest of everyone online to work with law enforcement and the larger security community to identify the gang and see the full force of law brought to bear against those who have made millions in ill-gotten gains. To this end, we will be sharing our intelligence with the rest of the online security community in the coming weeks in an effort to rid the Web of this virus forever.

To uphold our commitment to our users and the security of their data, Facebook takes a very aggressive approach against security threats ranging from the most annoying social spam to malicious viruses and malware. We have been awarded the largest damages ever under the CAN-SPAM Act, and we work with the authorities every single day to identify and prosecute wrongdoers. While we work diligently on removing these threats from the site, our Security Team is only truly satisfied when we can remove these threats from the Web entirely. As part of this continued fight against malware and cybercriminals, we wanted to give you an update on the Koobface virus.

When Koobface first surfaced in 2008, our team worked non-stop until we were able to detect the virus, remediate affected users, and eventually identify those parties responsible; we have been tracking them ever since. We will be sharing this investigation material, as well as information on how to best defend against the virus, with the larger security community. This will better enable sites still targeted by Koobface to more adequately protect their users.

Koobface was able to generate profit through pay-per-click and traffic referral schemes. After installing malware on a user's device, the Koobface gang was able to redirect the user's traffic and, in some cases, trick the user into paying for fake antivirus software. Koobface was able to perform these actions by communicating with a central "Command & Control" server, which directed the compromised computers to do the gang's bidding. While we were able to stem the spread of the virus using a variety of tools (including our URL blacklist and Scan-And-Repair) the 'Mothership' was left untouched.

This remained the case until last March, when Facebook Security was able to perform a technical takedown of this "Command & Control" Mothership. And since then we have had **no** new sightings of Koobface for over nine months and our teams are working hard to keep it that way.

In addition to our work behind the scenes, we have built a number of tools that have made our security protections some of the best on the Web and have spearheaded numerous user education campaigns to make sure that everyone knows how to best protect themselves online. A particular success is the Scan-And-Repair tool we built with McAfee to help our users keep their devices malware-free. Also of note is our URL blacklist system - a core component of the Facebook Immune system. This URL blacklist not only protects users from malicious URLs that Facebook discovers, but also protects people from known-bad URLs from all of our external partners.

Nothing is more important to us than ensuring the security and safety of our users and their data. Thankfully, we aren't in this fight alone: cybersecurity is a shared responsibility for law enforcement, industry and everyone who uses the Internet. We will continue to work with the broad security community and industry leaders, such as McAfee and Microsoft. We will stay firmly committed to our work with law enforcement in stopping these threats and bringing the bad guys to justice. Cybercrime involves and impacts real people, and we praise those in the security community for coming together to expose those who have broken the law. We are confident that our work in identifying those responsible will put a significant dent in their ability to harm those online and lead to a safer internet for all.

To find out more about Koobface please see the latest New York Times article or visit the Facebook Security Page.

Jessus. Just came across this and I decided to elaborate. It's 2012 and no one is fighting

[2]Koobface. It's just me doing research with success at the time.

If an image is worth a thousand words then check out some of the most recent publicly acces-

sible photos of Anton Nikolaevich Korotchenko also known as Koobface botnet master KrotReal

including some sample maps of his latest visits across the globe including possibly the fact

that he’s visited the United States which is quite a news taking into consideration his online

activities counting the total number of cities that he has visited internationally up to 65.

19.12.14 Who’s Pushing All The "Fake Updates" Malicious Software Using Redirec-

tors and Traffic Distribution and Redirection Systems and Tools Domains?

(2023-12-28 13:03)

[1]

28459

I’ve recently observed an increase in compromised or exploited to be precise in the context

of abusing unfixed web application flaws such as for instance redirection notifications on high-

traffic and high-profile Web sites where the ultimate goal would be to push traffic distribution

and traffic management rogue domains part of a URL redirection

chain where the ultimate

goal would be to utilize both legitimate high-traffic and high-profile Web sites including purely

malicious Web sites for the purpose of dropping malicious software on the targeted hosts.

The surprising part? The primary and entire portfolio of these traffic redirection and traffic

management domain are parked on 193.106.175.18 - AS50465 - IQHost Ltd where one of the

bigger domain farms is parked at hxxp://biggerfun.org.

[2]

28460

Sample misconfigured high-traffic and high-profile Web sites that allow redirections potentially

bypassing reputation filters include:

hxxp://afmonline.org/?URL=hxxp://khTrnB0WV8.biggerfun.org/khTrnB0WV8/

hxxp://whiskyparts.co/?URL=m88Z2iiER.biggerfun.org/m88Z2iiER/

20.1.1 Who's Behind the Conti Ransomware Gang? - Part Two (2024-01-03 16:35)

[1]

In a series of blog posts I exposed the "[2]The Top Management of the Conti Ransomware

Group's Fashion and Charity Brands" including "[3]Who's Behind the Conti Ransomware

Gang" where I also offered an in-depth peek inside "[4]The Conti Ransomware Gang and

the Trickbot Cybercrime Enterprise XMPP's and Jabber Account IDs" where I also successfully

applied for the Rewards for Justice program "[5]Applying for the Rewards for Justice on the

Conti Ransomware Gang Program" where I also published never-published or discussed before

"[6]New Images Courtesy of the Conti Ransomware Gang" including my Rewards for Justice

Conti Ransomware Gang research compilation "[7]Dancho Danchev's Rewards for Justice

Conti Ransomware Gang Research and Analysis Compilation" which you can grab from [8]here

including my first Twitter Space on how I tracked down the Conti Ransomware Gang "[9]My

28471

First Twitter Space on How I Tracked Down The Conti Ransomware Gang Using Real-Time

OSINT" including to expose "[10]Exposing Bentley and Liam From The Conti/Trickbot Malware

Gang" including to publish never-published or discussed before Conti Ransomware Gang

videos and images courtesy of the "[11]The Conti Ransomware Gang" including to publish

an additional set of never-published or released videos courtesy of the Conti Ransomware

Gang "[12]The Conti Ransomware Gang - Videos - Part Two" including to elaborate on some

of my research in my "[13]Rewards for Justice - Dancho Danchev" including to publish an

additional set of "[14]The Conti Ransomware Gang's OSINT Artifacts" including to also provide

"[15]A Compilation of Conti Ransomware Gang BitCoin Transaction IDs - An OSINT Analysis"

including "[16]A Compilation of Known Conti Ransomware Malicious Domains - An OSINT

Analysis" including "[17]A Compilation of Known Conti Ransomware Themed Malicious and

Fraudulent MD5s - An OSINT Analysis" including "[18]Exposing the Fashion Brands of the Conti

Ransomware Group" including "[19]Exposing the Trickbot Malware Gang - An OSINT Analysis"

including "[20]Exposing the Conti Ransomware Gang - An OSINT Analysis" including "[21]A

Compilation of Known Conti Ransomware Gang Malicious Executable Download Locations - An

OSINT Analysis" including "[22]Exposing the Conti Ransomware Gang - An OSINT Analysis"

including "[23]Rewards for Justice - Dancho Danchev" including "[24]How to Take Down the

Conti Ransomware Gang - A Practical And Relevant Case Study on Taking Down Cybercriminal

Infrastructure - A Practical Example".

In this post I'll do a last round of elaboration into all the research efforts I've been putting into

identifying core members of the Conti Ransomware Gang using their recently leaked internal

communication publicly including to use exclusively OSINT for the purpose of successfully iden-

tifying key and core members of what appears to be a diversified cybercrime gang that has

a pretty interesting way of distributing their fraudulently obtained income in the context of

sponsoring and participating in fashion shows and other educational and music sponsorship

efforts and campaigns on the Russian market supposedly using the stolen income that they've

obtained using their ransomware tactics and techniques.

What I came up was the following a private teaching school a rap and hip-hop music label where

we got some of the core Conti Ransomware Gang members doing their

advertising creative

and brochures next to doing their hardcore "upcoming" ransomware brand releases including

several fashion and clothing brands where we once again have core members of the Conti

Ransomware Gang doing their advertising and brochure creative.

The primary goal behind this post and analysis would be to elaborate as to the diverse nature

of the members of the Conti Ransomware Gang in the context of having them involved in

fashion music and teaching schools business and charitable initiatives in Russia supposedly

using the stolen income which they obtained using their ransomware operation online.

It’s also worth pointing out that this entire analysis including the OSINT analysis and the OSINT

research and enrichment analysis is entirely based on the Conti Ransomware Gang’s internal

leaked communication and is done exclusively by me with some quite positive and confirmed

results already.

[25]

28472

Sample Conti Ransomware Gang image obtained using public sources based on the gang's

internal leaked communication for a cover of a Russian Rap and Hip-Hop Artist and his

album "Personality" apparently produced by the Conti Ransomware Gang's team members

responsible for the advertising creative development for the gang

Based on my research and analysis the photo obtained using public sources based on the

gang's internal leaked communication for a cover of a Russian Rap and Hip-Hop Artist and his

album "Personality" belongs to the Russian rap and hip-hop artist known as Linkvill where we

have members of the Conti Ransomware Gang producing their logos and advertising creative

part of their portfolio.

Personally identifiable information for Evgeny Samsonov also known as Linkvill:

hxxp://vk.com/eugene _linkvill

🎙 REC PLASTIKA
✨COVER Алексей Кибанов

...Не видел добра или зла, я не знаю ответ
Я допиваю дым молоком на обед

It appears that based on my OSINT analysis Alexey Plyushkin is the author of the original

cover for Ice Costa's album which can be also found in Conti Ransomware Gang's internal

leaked communication which means that he supposedly knows the actual team member of

the Conti Ransomware gang that produced the advertising creative who also produced Evgeny

Samsonov’s (Linkvill) album cover.

Next we got three related images once again courtesy of the Conti Ransomware Gang’s

internal leaked communication this time for "Global School" teaching enterprise and for the

Youla Land dance lessons school in Russia.

Sample photos include:

28527

Can you recognize apologies spot a dipship when you see one? Can the recognize the degra-

dation between his teeth or what would some other dipshits courtesy of him that don't exist

would consider something that doesn't exist to begin with the very presence of a human being

his teeth and relevant face sculpture to begin with?

This is not poetry. This is the deepest ugliest and most disgusting presence that I would stay a

million mile away to skip his relevance of existence to begin with.

There's a saying. The ones who are distusting are disgusting at all.

Beware and don’t even

bother the elaboration on this. Watch out for the irrelevance of these people and try to avoid

them to the bottom of your brains out and there’s not such word as out. The dipshitness of

your overall irrelevance is bothering other to be bottom of their irrelevance. The result? You

don’t exist. At all.

If you can spit it try to vomit it but vomit the bottom of your brain’s and idiocity’s irrelevance

to the bottom of your brain’s out. We will find and beat the bottom of your irrelevance out to

the bottom of your irrelevance out. You’re a disgusting presentation of people who dipshit on

each other and then skip the breakfast. And guess what? The dinner.

Stay tuned. But you don’t.

1 Career
2 Koobface investigations
3 2010 Disappearance
4 References
5 External links

Career [edit]

Danchev is known for discovering computer virus and spamming attacks as they surface on the Internet, and providing details on the new threats.[1] As a security researcher, he has been the first person to report major malware campaigns as they begin to take form.[2] Danchev has also discussed the use of new technology, like USB keys, and their potential effects on the internal security of the computer systems of major corporations.[3] Danchev reports on the use of new technology or methods of breaking through Internet security protocols as well.[4]

His blog posts and articles have included explanations of the overall landscape of the underground malware industry in countries like Russia and China,[5][6] in addition to the use of the Internet by terrorist networks.[7][8] The entities he has reported on include volunteer militias of hackers that independently attack the servers of enemy nations while their countries are in the midst of military operations, such as Russia's involvement in Georgia.[9] In 2009 he discovered that the Indian embassy in Spain had been taken over to serve malware to those who visited the site.[10] He also reports on the hacking of major corporate websites.[11][12][13]

Specific attacks that Danchev provided initial analysis for include a "Chinese hacktivist" attack on CNN.com in 2008;[14][15] the Operation Ababil attack on Wells Fargo, U.S. Bank and PNC Bank;[16] a 2009 malicious comment attack on YouTube and Digg.com;[17] a large 2010 blackhat SEO campaign affecting both Bing and Google searches;[18] a 2009 New York Times malvertisement attack;[19] and a 2010 attack on Network Solutions.[20]

Koobface investigations [edit]

In February 2010 Danchev posted an article called "10 things you didn't know about the Koobface gang", discussing various interactions he has had with them (they once redirected the Facebook website to his blog) and other pieces of information. In May the creators of the malware then forced its network to post a point by point response to the article on the screens of all the computers they had infected.[21] Danchev continued his investigations into the gang, eventually posting the full biographical details of some of its members on his blog.[22]

2010 Disappearance [edit]

In late 2010 *ZDNet*, which Danchev co-wrote, reported that he had disappeared from home in Bulgaria and was feared harmed.[23] On September 11, 2010 he submitted what would be his final post of the year, writing about a "cyber jihad" and during that month he also sent letters to friends stating that he was concerned that he was under surveillance.[24] After his disappearance ZDNet received a message stating that "Dancho's alive but he's

Dancho, HBGary is interested in talking w/ you about Threat Intelligence

---

From:greg@hbgary.com

To: dancho.danchev@gmail.com

Date: 2009-04-15 13:02

Subject: Dancho, HBGary is interested in talking w/ you about Threat Intelligence

---

Dancho,

My company, HBGary, is developing a new business unit which we call "Global Services". A keystone of the offering is tracking human and organizational factors behind malware threats. Your work, and some of the work of your peers, seems to be very good analysis in this area. Since the space is new to us, I want to tap the best minds in the industry to help us develop an offering. Would you be interesting in spending some time with our team to discuss your work and methodology? On the market side I am also trying to pin down what customers will actually pay for, and perhaps you have some insight here as well. I am willing to hire you as a consultant, and/or pay for your time and travel in any way that works for you. I will be at RSA next week, and our company has an event for customers in San Jose in the first or second week of May. I also travel to Washington DC quite alot.

20.2.1 A Case Study on a Bulgarian Dipshit Local Drug Addict Gang Member and A

Peasant From Troyan, Bulgaria Part of The Gang that Robbed and Kidnapped

and Home Molested Me (2024-02-11 10:48)

[1]

28585

When you’re so dumb that even the "drugs" can’t "catch you". The next thing that follows is

the laughing.

20.2.3 The Ugliest Bulgarian Wannabe Law Enforcement Officer Real Life "Cop" In

the Bulgarian "System" (2024-02-11 10:48)

[1]

28589

[2]

Can you suck my bottom? Do you have the permission of other people to do it before you suck

mine? Do you know what does this constitutes? Let's play a game. If my bottom is in the

ugliest and most disgusting part of the universe and you want to suck it does this mean that

you're there too? You don't exist.

We in the face of your parents should rather pay you to best yourself and stop existing and

make a free low profile non-existent and cheap movie out of it which is something that you

shouldn't forget doesn't constitute anything. It's the very art of having you beat yourself

courtesy of your parent's money and having the very same non-existent Bulgarian dipshits

pay you to beat yourself. While beating yourself you can easily forget about compilations

and series of movies about your beating simply because your very ugliness and disgusting

existence doesn't compare to that of a human being.

Document Outline

- 2005
  - December
    - How to create better passwords - why bother?! (2005-12-07 16:43)
    - 0bay - how realistic is the market for security vulnerabilities? (2005-12-12 16:40)
    - IP cloaking and competitive intelligence/ disinformation (2005-12-14 16:36)
    - Insiders - insights, trends and possible solutions (2005-12-19 12:22)
    - Cyberterrorism - don't stereotype and it's there! (2005-12-19 15:27)
    - Insiders - insights, trends and possible solutions (2005-12-19 15:33)
- 2006
  - January
    - What's the potential of the IM security market? Symantec thinks big (2006-01-04 12:18)
    - Keep your friends close, your intelligence buddies closer! (2006-01-04 13:11)
    - Security quotes : a FSB (successor to the KGB) analyst on Google Earth (2006-01-04 13:38)
    - How to secure the Internet (2006-01-04 14:22)
    - Happy New Year folks!! (2006-01-04 17:15)
    - What's the potential of the IM security market? Symantec thinks big (2006-01-04 17:17)
    - Keep your friends close, your intelligence buddies closer! (2006-01-04 17:18)
    - Security quotes : a FSB (successor to the KGB) analyst on Google Earth (2006-01-04 17:19)
    - How to secure the Internet (2006-01-04 17:21)
    - Malware - future trends (2006-01-09 17:22)
    - Watch out your wallets! (2006-01-10 17:24)
    - Would we ever witness the end of plain text communications? (2006-01-10 17:25)
    - Why we cannot measure the real cost of cybercrime? (2006-01-10 17:28)
    - The never-ending "cookie debate" (2006-01-10 17:30)
    - The hidden internet economy (2006-01-11 17:39)

- Security threats to consider when doing E-Banking (2006-01-12 17:40)
- Insecure Irony (2006-01-12 17:42)
- Future Trends of Malware (2006-01-16 17:43)
- To report, or not to report? (2006-01-16 17:45)
- Anonymity or Privacy on the Internet? (2006-01-16 17:47)
- What are botnet herds up to? (2006-01-17 17:48)
- China - the biggest black spot on the Internet's map (2006-01-17 17:49)
- FBI's 2005 Computer Crime Survey - what's to consider? (2006-01-19 17:51)
- Why relying on virus signatures simply doesn't work anymore? (2006-01-19 17:52)
- 2006 = 1984? (2006-01-23 17:54)
- Cyberterrorism - recent developments (2006-01-23 17:57)
- Still worry about your search history and BigBrother? (2006-01-23 17:59)
- Homebrew Hacking, bring your Nintendo DS! (2006-01-23 18:00)
- Visualization, Intelligence and the Starlight project (2006-01-23 18:01)
- The Feds, Google, MSN's reaction, and how you got "bigbrothered"? (2006-01-24 18:03)
- Security Interviews 2004/2005 - Part 1 (2006-01-26 07:22)
- Personal Data Security Breaches - 2000/2005 (2006-01-26 18:04)
- Skype to control botnets?! (2006-01-26 18:13)
- Security Interviews 2004/2005 - Part 3 (2006-01-26 18:46)
- Security Interviews 2004/2005 - Part 2 (2006-01-26 19:31)
- Twisted Reality (2006-01-30 18:15)
- How we all get 0wn3d by Nature at the bottom line? (2006-01-30 18:17)
- Was the WMF vulnerability purchased for $4000?! (2006-01-30 18:18)
- January's Security Streams (2006-01-31 18:19)

○ February
- Suri Pluma - a satellite image processing tool and visualizer (2006-02-02 15:28)
- CME - 24 aka Nyxem, and who's infected?

(2006-02-02 15:32)
- What search engines know, or may find out about us? (2006-02-03 15:33)
- The current state of IP spoofing (2006-02-06 10:01)
- Hacktivism tensions (2006-02-07 10:08)
- Security Awareness Posters (2006-02-07 13:35)
- A top level espionage case in Greece (2006-02-08 15:14)
- The War against botnets and DDoS attacks (2006-02-09 15:44)
- Who needs nuclear weapons anymore? (2006-02-09 16:29)
- Recent Malware developments (2006-02-13 16:43)
- Look who's gonna cash for evaluating the maliciousness of the Web? (2006-02-14 17:12)
- Detecting intruders and where to look for (2006-02-15 08:48)
- A timeframe on the purchased/sold WMF vulnerability (2006-02-15 19:03)
- The end of passwords - for sure, but when? (2006-02-16 19:15)
- How to win 10,000 bucks until the end of March? (2006-02-17 13:45)
- Smoking emails (2006-02-17 23:41)
- DVD of the weekend - The Lone Gunmen (2006-02-17 23:47)
- Chinese Internet Censorship efforts and the outbreak (2006-02-24 13:14)
- Master of the Infected Puppets (2006-02-24 14:37)
- Give it back! (2006-02-24 15:36)
- One bite only, at least so far! (2006-02-24 16:21)
- DVD of the Weekend - The Outer Limits - Sex And Science Fiction Collection (2006-02-25 20:35)
- Get the chance to crack unbroken Nazi Enigma ciphers (2006-02-27 10:49)

○ March
- DVD of the (past) weekend (2006-03-06 14:12)
- February's Security Streams (2006-03-06 14:44)
- Anti Phishing toolbars - can you trust them? (2006-03-06 16:04)
- Data mining, terrorism and security (2006-03-06 19:53)
- 5 things Microsoft can do to secure the Internet, and why it wouldn't? (2006-03-06 20:21)

- The Future of Privacy = don't over-empower the watchers! (2006-03-07 16:45)
- Where's my 0day, please? (2006-03-07 21:22)
- DVD of the Weekend - The Immortals (2006-03-10 14:23)
- Security vs Privacy or what's left from it (2006-03-15 12:41)
- Old physical security threats still working (2006-03-16 17:50)
- Getting paid for getting hacked (2006-03-17 13:19)
- "Successful" communication (2006-03-17 14:39)
- Is a Space Warfare arms race really coming? (2006-03-20 21:47)
